

Providing corporate trainings, workshops and consultancy

We believe we can share our expertise that help businesses and individuals succeed in today's ever-changing tech regulatory landscape.

Who We Are

We are a registered entity based out of India, providing advanced trainings and consultancy in the field of Data Protection, Data Privacy and AI regulatory compliance. We have served various clients across multiple countries delivering custom trainings, workshops and consulting.

Our trainings and workshop packages are designed to be delivered in person or online, hands on experience sharing, real template based activities, suiting to your organization culture and existing maturity levels.

Why Choose Us

Deep Industry Experience

22+ years of industry expertise, hands on working experience in Privacy offices. Strong enterprise risk management experience. We can share our ideas that worked and failed!

Consulting Expertise

We are committed to providing pragmatic advisory to the organizations having data privacy and AI regulatory obligations. Lets start with reasonable actions!

Rapid Value Creation

Through our custom trainings and workshops, existing teams can quickly scale up to the new regulatory challenges and adopt to industry best practices. Why hire new people?
